Outline Map of County, end of Book

PUBLISHERS ANNOUNCEMENT

The arrangement of this Book is as follows: First, Map of the township, showing the owner of record of each parcel of land. Where the division is too small to write in the name the land is listed by number. Under the Map you will find the Section and number with full description.

Following the listing of numbers is the Directory of all persons residing in the township, together with the address and Section on which he resides. By reference to the map above, if his name does not appear on the section given, he is a tenant. If his name is there he is an owner living on his own farm. The section given is the section on which he resides.

Every care has been exercised to obtain accuracy, but mistakes are bound to occur, and the publisher does not assume responsibility for errors or omissions. The transfer is of record March 19, 1934, but it is sometimes almost impossible to determine whether a transfer was made to quiet title, or is an actual change of ownership. We used the Auditor's tax record, and to go into any other records would be prohibitave on account of expense.
